#4: Using equity from your home

What is equity?

- Equity is the difference between what your home is worth and how much you owe on it. It's that simple. For example:

What can I use it for?

- Renovate, invest in shares/managed funds, buy another property or refinance

How much can I borrow?

- Availability to borrow a percentage (%) of your loan, usually up to 90%.

#4: Using equity from your home

How do I use equity for property investment?

There are two options:

1. A separate loan attached to your existing home loan for deposit (10%-20%) and a new loan initiated for the new property (80%-90%).

2. Cross collateralising properties together for value and having one loan split (investment and o/occ).

#5: Refinancing for Investors

- Interest-Only
- Line of Credit
- Fixed rate
- Split loan
- Low-doc

#6: What Next?

1. Know the amount you can borrow
2. Find out the costs
3. Get a suitable loan
4. Get pre-approval
5. Search for a property
6. Buy your property
 - Make an offer
 - Contract of Sale
 - Unconditional/Conditional offers
 - Finalise loan
 - Settlement
